In GAIKER, we contribute
**TO COMPANIES'
COMPETITION
IMPROVEMENT BY
TRAINING AND
RECYCLING
PROFESSIONALS.**

*In order to do so, we
possess the knowledge
accumulated all through
the years, a vast experience
in the technological field
and the adequate means.*

PLASTICS AND COMPOSITES
ENVIRONMENTAL AND RECYCLING
TECHNOLOGIES AND
BIOTECHNOLOGICAL TECHNOLOGIES

We offer training for companies through a completely customised offer, so as to satisfy at the utmost our customers' expectations.

Our training offer, based on the technological expertise knowledge, is the result of the constant watch-over of technological changes in the industrial scenario. GAIKER's Training activity has been consolidated through specifically training programmes, always aimed at the direct application of the knowledge to each job.

The object with these actions has been, and still is, the maximum co-operation with the company, so as to **OFFER SPECIFIC SOLUTIONS FOR SPECIFIC ISSUES**. Because of this, in GAIKER we do not hesitate when studying in depth each company's reality; we work in order to identify existing gaps in each of the cases and we put forward the most appropriate solutions. Depending on the results obtained, we adapt the contents, methodologies and duration of training actions.

For all this, from GAIKER we offer two types of training:

- **OPEN TRAINING ACTIONS:** They answer the companies' most common and general needs. These actions are developed at specific times all through the year and their contents conform a definite programme, always on the basis of GAIKER's know-how.
- **TAILORED TRAINING ACTIONS:** They answer a company's specific needs or a group of companies' on the basis of some specific contents. These actions are tailored to the whole group of professionals in each company, with the possibility of their being given at their own premises, following the schedule and dates most adequate for applying companies.

The means, both human and material, that GAIKER offers its customers include the following:

- **TRAINERS:** This is a group made up of researchers and technicians from GAIKER that possess important technical knowledge, together with a wide practical experience.
- **PREMISES:** Our classes are equipped with state-of-the-art audiovisual resources and, definitely, they offer unique conditions for training. Likewise, there are laboratories and production equipment for the practical side of training.
- **DOCUMENTATION:** Training actions are accompanied by a documentary support, specifically designed for each of them, both regarding tailored training actions and open training actions.

INFORMATION AND DOCUMENTATION SERVICE

B

Because of the fact that **INFORMATION IS THE BASIS FOR KNOWLEDGE**, GAIKER offers companies the following services in order to improve and increase their knowledge related to subjects applicable to the industry:

SERVICES

BIBLIOGRAPHICAL INFORMATION AND RESEARCH

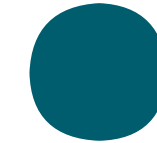

GAIKER's Documentation Centre has very rich documentary resources (books, magazines, proceedings, yearbooks, newspapers, etc.) by means of which exhaustive bibliographical researches are performed which, joined to the later localisation and achievement of documents, both internal and external, allow us to offer companies the most complete and updated information.

LEGISLATIVE INFORMATION

The Documentation Centre has daily access to all EU, national and autonomous official gazettes. The follow-up and the update of law subjects, researches, compilations and localisation of original documents are the services offered by the Documentation Centre in this section.

INFORMATION ON TECHNICAL RULES

As a Documentary Centre of a technological nature, GAIKER follows very closely the new rules that are released, accessing the most important ruling bodies, both at national and

international level (AENOR, AFNOR, ASTM, DIN, etc). Researches and listing of rules about specific subjects are carried out, as well as establishing the links existing among them.

Researches of listing of rules about specific subjects are carried out, as well as establishing the links existing among them.

INFORMATION ON PATENTS AND TRADEMARKS

The follow-up of patents constitutes a very important factor for Technical Training, since it gives a scent of the technological advances in industrial sectors. Researches of patents, reference information and securing of documents are carried out.

FINDING COMPANIES

This service offers information about companies through the development of sectorial, geographical lists and so on. This service suits very well trading targets and can be used for the enlargement of markets.

ADVANCED SERVICES

- **Technology Alert**, is a kind of service that tries to provide for an information in accordance with each user's demand; in order to do so, the company's active co-operation is necessary, which company has to tell us the specific subject it wants to be informed about, so that, from the Documentation Centre, we can work towards meeting its requirements.

The Technology Alert service offers the client documentary information (related to rules, law, current affairs, etc), tailored to his needs.

- **Technology Surveillance** is the group of means and resources through which information is systematically compiled, analysed and spread so that the company can get before technological changes, allowing it to get ahead and create business opportunities and actions.

GAIKER develops Technology Surveillance Technical Reports that **TRY TO KEEP COMPANIES INFORMED** about innovations, news, applications, etc. on specific sectors.

PRODUCTS

The **PRODUCTS** offered to companies are the following:

- **The Informative Bulletin:** This is a two-monthly document whose target is to keep users up-to-date regarding the latest news received at our Documentation Centre. There is one Bulletin issued for each of the technological areas that are mentioned:

- I. Materials
- II. Environment - Recycling
- III. Industrial Biotechnology

It has the following common structure:

1. Received documentation including books, proceedings, yearbooks, etc.
2. Specialised magazines.
3. The "latest news" on:
 - law
 - rules
 - brief news
 - calls
 - agenda.

- **Informative Sheets:** In the form of "flying sheets" and with no definite periodicity, they try to communicate, in a more lively manner, the latest information on subjects that, because of their nature, need a faster and more lengthy treatment. Their use is linked to subsidies, law or interest topics that need a fast and in-depth treatment. The indefinite periodicity of this document is due to the fact that it is important to communicate its contents urgently, something that makes it fast and quick to deliver.

- **Green Pages:** These are a monthly compilation of environmental laws released both at European, state and local levels.

If the user wishes to receive the full documents, they can ask for the one they are interested in, or they can subscribe to a particular aspect of environmental law. These law references are compiled yearly in the Green Yearbook.

- **Food-Lex:** This is a monthly compilation on food laws both at European, state and local levels. Like the green pages, users can receive the full documents by means of this service, either asking for the specific document, or by subscribing to a particular topic of food laws. These law references are compiled yearly in the Food and Law

Yearbook.

By means of these products, **WE TRY TO INCREASE COMPANIES TECHNOLOGICAL DEVELOPMENT, OPENING AND EASING THEIR ACCESS TO THE INFORMATION MARKET,** the knowledge of which is nowadays a strategic value for any company that wishes to dispose of it in the same conditions as the rest of its competitors.

- **Bibliographical Funds Catalogue:** It includes all the yearly releases by the Documentation Centre.
- **Release Catalogue:** It reflects all the contributions made by GAIKER in technical magazines, meetings, conferences, round tables, etc.
- **Green Yearbook:** This is a compilation of environmental law references collected all through the year.
- **Food and Law Yearbook:** Yearly references on food-related laws.

Together with Products and Services, the Documentation Centre issues yearly a series of **Compilations, Yearbooks and Catalogues** with all the information and activities developed and collected by GAIKER:

The services and products offered by GAIKER's Documentation Centre have been created to **OFFER COMPANIES THE APPROPRIATE INFORMATION IN TERMS OF CONTENTS AND TIMELINES, IN AN UPDATED AND CUSTOMISED WAY**, all of this managed through the Documentation Centre.

DISSEMINATION

GAIKER's spreading offer tries to support the **CO-OPERATION, ENCOURAGEMENT AND BOOSTING OF INNOVATION CULTURE** by means of the organisation through actions aimed at companies that they can use to know, from the technological point of view, the current situation, news and future perspectives of the technical topics that worry us most.

Among the activities that are developed, we have the issue of knowledge-spreading documents and event-organisation such as Seminars, Conferences, Meetings,... that are held all through the year in our premises in the Technology Park.

The Dissemination offer is targeted at **professionals with qualifications** in the topics above mentioned, always thought of on the basis of **"alive" subjects and up-to-date in the industry** that have, in the case of events, with the participation of important speakers with experience and interesting statements, which are compiled in an exhaustive documentation given out to all of the participants.

THROUGH THE
DISSEMINATION
OFFER, GAIKER
SEEKS TO
CONTRIBUTE TO
THE
ENCOURAGEMENT
AND BOOSTING
OF THE
INNOVATION
CULTURE
